

KIS

Risks and benefits associated with TEL

Mark Gamble
University of Bedfordshire

KIS reporting of teaching and learning methods is under three general headings:

- **Scheduled learning** defined as *‘any activity that a student has to attend or undertake at a fixed point and that has no flexibility for when it is undertaken’*.
- **Guided independent study** defined as *‘online or group work that may be undertaken at a time of the students’ choice’*.
- **Placement/study abroad.**

- **Scheduled learning:** any activity that a student has to attend or undertake at a fixed point and that has no flexibility for when it is undertaken.
- **Guided learning:** activities defined (structured, time-defined and scaffolded) by the tutor and expected of learners within a specified period, rather than at a set time.
- **Independent learning:** activities recommended by the tutor to learners in order to augment their studies and undertaken at a time of the students' choice.
- **Autonomous learning:** activities determined by learners and undertaken at a time of their choice.
